

## Custom Configurations - Cont.

### Traveling Floor Chunker

Feeding into a vertical twin belt dough elevator, in a reverse-feed direction, back over the chunker to another dough delivery conveyor. A forward feeding direction is also an option.

### Mobile/Stationary Floor Chunker

Feeding dough chunks onto a timed, flighted dough conveyor for precise feeding of the dough into the primary dough feeder on the production line.

## Options and Accessories

\*Teflon® coated blades

\*Swirl finished hopper

All types of non-stick finishes can be applied, and for real sticky doughs an oil spray system can be outfitted.

System operator control stations can be designed and built to meet the exact needs of your process, with or without PLC Logic, as needed. Assembled in a sanitary, NEMA 4, washdown style.
