

AM MANUFACTURING COMPANY

# DUAL BANK ROTARY KNIFE DIVIDER/FORMER™ MODEL RK4200

©1994

• Increased bagel production rates of up to 11,600 pieces per hour are possible with AM Manufacturing's New RK4200 Dual Bank Rotary Knife Divider and Former. The RK4200 is a completely American made product - built to last and backed by our commitment to quality service and customer satisfaction. The unit's main components, a dual knife divider and dual lane former, are easy to operate and maintain. The components are connected by a stabilizing bracket which secures the unit's alignment and floor position, as well as insures smooth, consistent performance. Optional equipment, including a transfer conveyor with rotary table is available to tailor the RK4200 to your specific needs and requirements. Once again AM Manufacturing sets the industry standard — A company practice for over 30 years.
