

## Damark Semi-Automatic L Bar Sealers

*Damark Model SMC2228 Semi-Automatic L Bar Sealer.*

*Damark Model SMC1620 L Bar Sealer with optional power film unwind system and air table loading station.*

The **Damark Semi-Automatic L Bar Sealers** come in many different sizes and configurations to meet your shrink packaging needs. They are heavy duty, with welded steel tubular construction that is rugged and reliable, built to last. The micro-processor controlled impulse sealing system provides consistently strong seals and superior operator safety.

The Damark Semi-Automatic L Bar Sealers come in three different series:

**Series SM** - Sealer with twin magnet lock down and flat discharge section.

**Series SMC** - Sealer with twin magnet lock down and power takeaway conveyor.

**Series SMCP** - Sealer with twin magnet lock down, power takeaway conveyor and pneumatic operation of sealing head.
