

Spartan's single rack oven has been designed and engineered to perform to the highest standards established by both the bakery and foodservice industries. The combination of the latest technology, materials and electronics provide the operator with a reliable, consistent and durable oven. The Spartan single rack oven will bake delicate pastries, cakes and breads as well as roast both meats and poultrys and reconstitute meals.

The Spartan single rack oven has been designed, engineered, and built with the operator in mind. It provides the necessary features to make their job as trouble-free as possible. Consistent performance is the result of our easy to use automated controls, heavy duty lifting system, high volume steam, gentle airflow, and energy efficient design.

The Spartan Single Rack Oven is a perfect addition to your high volume bakery, wholesale operation, kitchen or restaurant.

The ovens are manufactured by Spartan in Long Island City, New York, U.S.A. We have qualified Sales Representation and Service/Installation Agencies throughout North America.
