

SuperGrain *3-D Sheeting Head*

Application

The **SuperGrain® 3-D Sheeting Head** provides gentle three step sheeting and degassing for more volume and and uniform cell structure.

Features

- Utilizes 6 sheeting rollers plus degassing rollers to gently and uniformly sheet dough by controlling input energy and yielding an extremely uniform cell structure.
- Can be retrofitted to existing moulders.
- Fits many dough moulding needs including cross grain moulding, straight grain moulding, SuperCurl moulding.
- Cast iron sheeting head frames... best support for rollers, bearings and scrapers.
- Gear-driven, precision-machined rollers, solid steel core with teflon sleeves.
- Digital indicators for precise roller spacing.
- Adjustable degassing roller assembly
- Open guarding.
- Self-centering infeed dough guides.

Specifications

- Production Speeds Up to 120 loaves per minute
- Product Range 3 oz to 56 oz
- Drive Motor 1/2 HP

3-D Sheeting Head Drive Components and lubrication infeed lines.
